We Support the Health Care Conscience Rights Act

The ability of each individual to conduct all aspects their lives in accord with their conscience is one of the most basic human rights. Yet, the "Affordable Care Act" (Obamacare) compels many actions, which violate the deeply held religious beliefs of millions of Americans. The Health Care Conscience Rights Act [HR 940 / S1204] amends the ACA so that no individual, employer or insurance issuer is required to buy, carry or sell policies that cover abortions, or other products / services to which they object. It bans taxes or fines due to such 'non-coverage'. It protects all health providers and insurance carriers from government punishment for not covering abortions or other objectionable products / services. **We, the undersigned, strongly urge you to vote YES on H.R.940 / S.1204.** Thank you.
